

SAIJITH C

Frontend Developer (Flutter & Dart)

+91 8139812226 saijith053@gmail.com Portfolio GitHub LinkedIn

Bangalore, India

SUMMARY

Frontend-focused Flutter Developer with over 3 years of experience building scalable mobile and web applications using Flutter and Dart. Strong expertise in Firebase, REST APIs, and MVVM architecture, with a proven track record of delivering enterprise-ready products, improving stability, and owning end-to-end product execution from planning to production.

EXPERIENCE

Flutter Developer

SalesGO CRM Technologies, Bangalore, India

2022 – Present

- Spearheaded development of **SalesGO 3.0**, implementing two-factor authentication, geofencing, voice-to-text, push notifications, and DigiCard integration.
- Maintained and enhanced **SalesGO 2.1 CRM**, improving performance and stability.
- Built **SalesGO Bandhan Visits 3.0** using Flutter, delivering scalable and maintainable frontend solutions.
- Developed **SalesGO Leads** with LinkedIn integration, dynamic fields, and enterprise-grade UI flows.
- Designed and developed an **MIS dashboard** to track KPIs, generate reports, and manage campaigns.
- Owned **VAPT fixes and security hardening** across **mobile and web applications**.
- Managed **App Store and Play Store releases** across internal, beta, and production tracks.
- Implemented **Firebase Crashlytics and Analytics** for proactive monitoring, user insights, and reduction of production crashes.

Technologies: Flutter, Dart, Firebase, REST APIs, MVVM

Flutter Developer

Brototype, Calicut, Kerala, India

2022

- Built multiple reviewed projects as part of an intensive self-learning and mentoring program.
- Collaborated with team members to implement complex features and improve overall code quality.
- Followed Flutter best practices, clean code principles, and effective state management using Provider.

Technologies: Flutter, Dart, Firebase, Provider, Git

ACHIEVEMENTS

- Led and conducted a cross-functional **hackathon initiative** to build the **MIS Dashboard, SalesGO Leads (Web & Mobile)**, and **SalesGO Bandhan Visits 3.0** from scratch, owning planning, task breakdown, and coordination across frontend, backend, and UI/UX teams.
- Successfully delivered **production-ready applications within 3 days**, followed by QA validation, stakeholder approval, and live deployment on App Store, Play Store, and Web platforms.

SKILLS

- **Frameworks & Languages:** Flutter, Dart
- **State Management:** Provider, Riverpod, GetX, Bloc
- **Tools:** Firebase, Hive, Postman, Figma, Git
- **Architecture:** MVC, MVVM, Clean Architecture
- **API Integration:** RESTful APIs

EDUCATION

B.Com in Computer Application

University of Calicut

2017 – 2020

PROJECTS

SalesGO Leads

Flutter-based enterprise CRM application

[Play Store](#) [App Store](#) [Web](#)

- Built the entire frontend using Flutter and Dart, converting UI/UX designs into scalable, high-performance components.
- Contributed directly to onboarding **2 new enterprise clients**.
- Followed **MVVM architecture** with reusable widgets and optimized state management using Provider.
- Integrated LinkedIn authentication, dynamic field generation, RESTful APIs, and push notifications.

Technologies: Flutter, Dart, MVVM, Provider, Firebase, REST APIs, CI/CD

SalesGO Visits

Field sales visit tracking application

[Play Store](#) [App Store](#) [Web](#)

- Developed and enhanced major features, enabling onboarding of **4 new enterprise clients**.
- Implemented geofencing-based check-in/check-out and visit scheduling.
- Added voice-to-text notes, media attachments, and push notification reminders.
- Integrated DigiCard sharing via QR code, WhatsApp, Email, and LinkedIn.

Technologies: Flutter, Dart, MVVM, Riverpod, Firebase, REST APIs, CI/CD
